

Dear Relevant Parties and FCC Staff -

It is with great hope I write to you asking for your consideration of the value we as Americans shall gain through the improvements that satellite broadcasters stand poised and waiting to deliver to our people. We are a land that strives for the admiration of the whole world in our ever increasing effectiveness as we harness the dreams of our forefathers. As a country that prides itself on the productivity of its citizens, it stands to reason that the enhancement of our lives this technology offers should, as a matter of course, be integrated into the common day we each may experience as we seek to make our contribution to society and to the wealth of this great nation.

I urge you to reject NAB's petition 04-160 and instead to support satellite broadcasters' desire to advance the programming, information and services they can offer to the people of the United States of America.

Sincerely,
Killian J. Leese
Boston, MA
